Nano Kit EFC-3

Control unit for 10 tanks

Repowering for EFC-3 systems

Brings the fermentation temperature control system up to date!
Fully assembled kit for 10 tanks. Simple, quick exchange.
Unplug the old units, insert the kit and screw on the mounting plate - done!

The modern fermentation control for 10 tanks with a large actual and target temperature display. The iFerm Nano Kit can be operated with the iFerm Nano Terminal control unit operated centrally and significantly expanded in function.

Technical specifications:

- Display: target and actual temperature
- Accuracy: +/- 1.0 ° between 0 ° C and 40 ° C
- Resolution: +/- 0.1 °
- Measuring range: -9.9 ° ... + 99.9 ° C
- Controller types: PID
- Operating modes: cooling, heating
- Ambient temperature range: -10 .. + 40 ° C
- Switching outputs: 24V AC, 2A
- Protection: IP54

Note: Not suitable in connection with PC software FermAssist!
                When ordering, we need the serial number of the control cabinet!
