Nano Solo l 230 V MV

iFerm Nano Solo: **Unpack - Plug in - Start Fermenting**
The iFerm Nano Solo is supplied complete with temperature sensor, solenoid valve and bayonet fittings. One only has to connect the unit to the power and cooling water supply. Clear arrangement with a large actual and target temperature display. The stainless steel backing plate fits many installation types with the additional bungee cord hook.

Technical Data:
- Valve: 1/2" solenoid valve
- Bayonet Fitting: GEKA Plus
- Temperature Sensor: ~5 meters with weight for fitting
- Visual Display: Actual and target temperature
- Accuracy: +/- 0.5°
- Resolution: +/- 0.1°
- Range: -9.9°...+99.9°C
- Controller Type: PID
- Operational Modes: Cooling, Warming
- Housing: Plastic, PC (Polycarbonate) with GF
- Ambient Temperature: -10..+40°C
- Electrical Supply: 230 V AC [50Hz alternation]
- Connecting Cable: ~5 meters with plug-in transformer
- Measurements: WxHxD: 120x120x240 mm
- Protection Class: IP65
