

Nano Fix

Plug and Play

PLUG AND PLAY - Fermentation Controller

The Nano Fix is supplied complete with temperature sensor, motorized ball valve and power supply. One only has to connect the unit to the power and cooling water supply. Clear arrangement with a large actual and target temperature display.

Technical Data:

- Valve: 1/2" Motorised ball valve with 5m cable
- Temperature Sensor: Diameter: 6 mm with ~5m, 1/3 DIN
- Visual Display: Actual and target temperature
- Accuracy: +/- 0.5°
- Resolution: +/- 0.1°
- Range: -9.9°...+99.9°C
- Controller Type: PID
- Operational Modes: Cooling, Warming
- Housing: Plastic, PC (Polycarbonate) with GF
- Ambient Temperature: -10..+40°C
- Electrical Supply: 230 V AC [50Hz alternation]
- Connecting Cable: ~5 meters with wall power supply
- Measurements: WxHxD: 120x120x240 mm
- Protection Class: IP65
